SUMMARY

Master's student in Computer Science with hands-on experience in frontend, backend, and AI-driven software development. Skilled in Python, TypeScript, React, Next.js, and modern development workflows, with a strong interest in building scalable, reliable applications.

EXPERIENCE

Example Digital University April 2026 - Present
Software Engineer - Part-time Potsdam, Germany — Remote

- Redesigned and enhanced the frontend using Next.js, React, TypeScript, and MUI, delivering new participant-facing features integrated with existing APIs.
- Improved frontend usability by fixing UI bugs, smoothing user flows, and enhancing responsiveness across screens.
- Delivered reusable and maintainable UI components that improved design consistency and code quality.

Research Institute Example April 2025 - March 2026
Software Engineer - Part-time Frankfurt, Germany — Remote

- Contributed to an interactive learning platform by building dashboards with Next.js and Material-UI.
- Deployed the application on self-hosted servers using GitLab CI/CD pipelines.
- Developed and tested Python/Django backend components for video processing workflows.

HashPotato January 2023 - March 2024
Software Engineer - Full-time Karachi, Pakistan

- Drove key development initiatives using Python, Django, Node.js, PostgreSQL, and Docker.
- Designed and maintained scalable microservices, reducing downtime and improving reliability.
- Implemented CI/CD pipelines for automated build, testing, and deployment.

EDUCATION

Frankfurt University of Applied Sciences, Frankfurt, Germany March 2024 - March 2028
M.Sc. in High Integrity Systems

Institute of Business Management, Karachi, Pakistan August 2019 - May 2023
B.Sc. in Computer Science

50% Merit Scholarship · Grade: 3.49/4.0

ACHIEVEMENTS & AWARDS

Appreciation Award May 2023
COMPPEC Karachi, Pakistan

- Presented the Bachelor's Thesis project at a national computer project exhibition.
- Received an Appreciation Certificate for innovation and technical implementation.

PROJECTS

University Management System – (UniBoard) August 2022 - May 2023
Bachelor's Thesis Karachi, Pakistan

- Engineered a full-stack university management system enabling students and faculty to manage academic resources.
- Designed a room scheduling algorithm leveraging weighted logic to optimize allocations.

Node.js, JavaScript, EJS

TECHNICAL STRENGTHS

Languages	Python, JavaScript, TypeScript, C/C++, HTML, CSS
Frontend	React.js, Next.js, Material UI, Tailwind CSS, ShadCN
Backend	Node.js, Django, Flask, FastAPI
AI & Data	LangChain, NumPy, RAG, Vector Search
Databases	PostgreSQL, MySQL, Supabase, Redis, Neo4j

DevOps & Cloud	Docker, Jenkins, GitLab CI/CD, AWS
Practices	SDLC, Clean Code, TDD, Agile

LANGUAGES

English	C1
German	A2
